## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 2 and 4-16 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The various references to different forms of the shape modifying means and the releasing forces are not specifically detailed in the specification to enable the skilled artisan to make the device. Applicant has failed to address this rejection in the remarks in the amendment accompanying the Request for Continued Examination.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 2, and 4-16 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph. Claim 7 – it is unclear as to the location of the contiguous regions. Claims 11 and 12 – “a surgical device or transmitting signals” is vague since the first defines a structure while the latter sets forth a function. Claim 12 - the phrase "in particular" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d). Claim 16 fails to set forth any particular method steps.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 9, 10, 15, and 16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Avery (3,774,618). Applicant's attention is directed to Figures 3-7. The device of Avery assumes the shape of the nerve. Applicant's remarks failed to set forth how the claims specifically define over the Avery reference. Intended insertion techniques fail to define the actual claimed structure of the device over that disclosed by Avery.

Claims 1, 2, 9, 10, 15, and 16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Edell et al (5,476,494). Applicant's attention is directed to Figure 5 and column 7, lines 11-34.
